To whom it may concern, My Brother who happens to be a Professional Truck Driver of 28 years contacted me this evening and told of the issue with the NAB lobbying trying to ban the weather & traffic updates available on XM Radio. He uses this as a very valuable tool in his Profession.

For Instance if the traffic is backed up on his route he can make accommodations ahead of time to either try another route or call to make arrangements for late arrivals or pickups. Which works as a very good tool in that aspect.

Also as for the weather updates that is also a very important role in his profession as he can route his trips over different Interstate routes especially over the Western mountain passes he has to travel over during the winter months.

I think if a person is paying a monthly subscription to a Company that offers all this information, They & the Company (XM-Radio) have every right to use it or sell it to their customers. This a Country of free trade, speech & so on.

The NAB receives their income from selling Commercial Spots on the air, Not everyone wants to hear all the Bull Advertising that supports their ability to be on the air & capitalize on their behalf.....for instance 45 minutes of music & 15 minutes of advertising.....who needs it. That is your right turn it off and Pay a Company not hear their Crap or keep listening and make the NAB Bigger & Greater.....who needs them.....Just another Big Brother trying to do away with what the average AMERICAN actually enjoys, pays for & uses to their benefit.

What is this Country coming to anyway!!! GIVE ME A BREAK!!!!!!

Sincerely on Behalf of my Brother Chuck, who happens to be out on the road at this time using the service's of X-M radio, Thank's, Terry Lefforge
